Instructions: List all past and current predoctoral and postdoctoral trainees for whom the research mentor was/is the research advisor or sponsor (past 10 years only). If applicable, indicate in parentheses under the trainee name any different surname that was used where training occurred. Exclude academic advisees, unless they are heavily engaged in research. For each trainee, indicate whether the training is past or current, the training period (and degree), training institution, the training role of mentor, title of research project, and the current position for past trainees and source of support for current trainees.

Mentoring Table

Instructions: List publications of predoctoral and postdoctoral trainees resulting from their period of training under the mentor or in association with the training program regardless of when the publication actually appeared. In parenthesis, include the year the trainee started graduate studies, and if appropriate, when they completed their training. List abstracts only if a more complete publication has not appeared and label these clearly as abstracts. List publications followed by abstracts in chronological order. Boldface the trainee's name in the author list. When citing articles that fall under the Public Access Policy, were authored or co-authored by the trainee and arose from NIH support, provide the NIH Manuscript Submission reference number (e.g., NIHMS97531) or the PubMed Central (PMC) reference number (e.g., PMCID234567) for each article. If the PMCID is not yet available because the Journal submits articles directly to PMC on behalf of their authors, indicate "PMC Journal - In Process." A list of these Journals is posted at: http://publicaccess.nih.gov/submit_process_journals.htm
