Dear Colleagues:

Greetings for the New Year and New Decade!

There is a widely cited Chinese proverb often attributed to Confucius that admonishes, "May you live in interesting times." Rapid and dramatic change always has a way of making things interesting, and the present is certainly filled with that!

Yet, while there is dramatic change in the world around us, most of us continue to live our lives within the comforting boundaries of predictable routine. Although each new year invites goal setting and changes, modifying lifestyles can be difficult.

With these thoughts in mind, this month’s Research Resources includes a timely Wilma West Library Note on research related to habits and New Year resolutions. It also features a list of upcoming articles to be published in OTJR: Occupation, Participation and Health.

Believe it or not, 2010 marks the 30th anniversary of this journal! And to honor routine, you will find our regular announcements and links with potential interest to our subscribers.

As always, we thank you for your continued interest in Research Resources and for your support of the Foundation.

Sincerely,

Charles Christiansen
Executive Director
Interim Director, Institute for the Study of Occupation and Health

Wilma L. West Library Resource Notes

The making of New Year’s resolutions and a key concept of Occupational Therapy

Probably every one reading this item has made, or at least entertained the thought of making, a New Year's resolution to change a habit you considered disadvantageous to your health, career, relationships, or lifestyle. The concept of habits as a major component of occupational behavior
dates back to the early history of occupational therapy (Kielhofner, Barris & Watts, 1982). Common habits or behaviors on the New Year's resolution lists people wish to stop or accomplish are smoking, weight loss, money handling, alcohol consumption, etc. These habits or behaviors, as well as the difficulties they cause, are easily identified.

Individuals living with chronic physical or psychiatric disabilities must first come to the realization that habits or habitual routines not inherently detrimental to them may still need to be changed in order for them to participate in the occupations they value or to perform their daily activities (Charmaz, 2002; Davidson, 2007). "In a qualitative research study about adaptation to physical disability, five women describe the difficult process of reconstructing former habits and developing new habits" (Macdonald, 2007, p.99s).

The American Occupational Therapy Foundation (AOTF) has sponsored three interdisciplinary conferences on the subject of habits. The proceedings were published as supplements in the *Occupational Therapy Journal of Research* (2000) and in *OTJR: Occupation, Participation and Health*, 2002 and 2007.

NIDRR invites applications for new awards for fiscal year (FY) 2010. Deadline for Transmittal of Applications: February 1, 2010. The purpose of the Research Fellowships Program is to build research capacity by providing support to enable highly qualified individuals, including those who are individuals with disabilities, to conduct research on the rehabilitation of individuals with disabilities.

Redefining Boundaries and Bridges in Occupational Science (October 14-16th, 2010, London, Ontario)

The Society for the Study of Occupation: USA (SS0:USA) and the Canadian Society of Occupational Scientists (CSOS) are soliciting abstracts for a joint conference bringing together an international group of scholars who share an interest in advancing methodological, theoretical, and empirical knowledge related to the study of occupation. Abstracts for research papers, theoretical papers, panels, forums and posters must be submitted by 12:00 midnight EST on February 15th, 2010.

IARC 2010 - 14th International Aphasia Rehabilitation Conference (June 27-29, 2010, Montreal, Quebec)

This international conference will bring together researchers and clinical specialists in Speech-Language Pathology, Linguistics, Neuropsychology, and Rehabilitation Medicine dedicated to aphasia rehabilitation.

HUD and DHS Launch Disasterrecoveryworkinggroup.gov to Solicit Public Comments

Housing and Urban Development (HUD) and Homeland Security (DHS) announced the launch of DisasterRecoveryWorkingGroup.gov - a new interagency website that will allow federal disaster recovery officials to solicit public comments from state, local and tribal partners and the public. The new website will be used by the federal government's newly-formed Long Term Disaster Recovery Working Group to allow stakeholders to submit ideas for disaster recovery; articulate objectives for recovery assistance going forward; identify examples of best practices; raise challenges and obstacles to success; and share thoughts, experiences and lessons learned.

State Preparedness Rankings Released

Trust for America's Health and the Robert Wood Johnson Foundation released their 7th annual Ready or Not? Protecting the Public's Health from Diseases, Disasters, and Bioterrorism report. This year's report examines public health emergency preparedness in the context of the H1N1 flu virus and the economic downturn. It finds the H1N1 flu
outbreak has exposed serious underlying gaps in the nation's ability to respond to public health emergencies and that the economic crisis is straining an already fragile public health system.

The report also contains state-by-state health preparedness scores for all 50 states and Washington, DC based on 10 key indicators to assess health emergency preparedness capabilities.

Beyond Health Care: New Directions to a Healthier America

The Robert Wood Johnson Foundation Commission to Build a Healthier America has developed recommendations for the future of health in America. The Commission focused on people and the places where they spend the bulk of time--homes and communities, schools and workplaces--to identify where people should make healthier choices and where society should remove the obstacles preventing too many American's from making healthy decisions.

The recommendations are the result of intensive study and debate, reflecting the need to identify cross-sector interventions beyond the health care system that are likely to achieve a significant positive impact on the health of all Americans in years, not decades.

Help the CDC Create a Website for Disability & Health Data - Take a Short Survey

The Disability and Health team at Centers for Disease Control and Prevention is in the process of improving their website to be launched spring 2010. This improvement project includes the development of an online interactive database application to store and display data about people with disabilities compared to those without disabilities across a variety of health topics. As part of their preliminary work on this project, they are conducting an anonymous survey to find out your information needs, what features would be useful to you, and how this tool can be most effective and user-friendly.

Short Survey (approximately 15 minutes)
Specific questions about yourself and how you might use data related to people with disabilities. Exp Date March 31, 2010.

OR

Standard Survey (approximately 30 minutes)
Specific questions about yourself and how you might use data related to people with disabilities. We may also ask you to answer a few questions using charts that could appear in the new web application, so we can learn about what formats you like best. Exp Date March 31, 2010.

Publication Announcements

Special Issue of the Journal of Public Health Management and Practice Seeks Abstracts
The Journal of Public Health Management and Practice (JPHMP) in
Place Integration Through Daily Activities 1 Year After Stroke
Anette Erikson, OT, Lic. Degree in Med.; Melissa Park, OTR/L PhD; Kerstin Tham, OT, PhD

Occupation and Meaning: Narrative in Everyday Activities of Women With Chronic Rheumatic Conditions
Sissel Alsaker; Staffan Josephsson, PhD, OTR

Hands-On Learning Versus Learning by Demonstration at Three Recall Points in University Students
Morna Kathleen Hearns, MOT, OTR/L; Barbara Kopp Miller, PhD; David L. Nelson, PhD, OTR/L, FAOTA

No One Dresses Accidentally: A Research Synthesis on Intentional Occupational Performance
Jeffrey L. Crabtree, MS, OTD, FAOTA

Exploring Occupational Balance in Adults With Rheumatoid Arthritis
Mary Forhan, MHSc.BSc.OT Reg (Ont); Catherine Backman, PhD, OT(C), FCAOT

collaboration with the ASPH/Pfizer Public Health Academy of Distinguished Teachers (Teaching Academy), will publish a theme issue in May 2011 on “Teaching and Learning in the Community.” JPHMP is a peer-reviewed bimonthly publication recognized as the nation’s leading practice journal in population health.

Submission of abstracts by students or student groups is encouraged. Abstracts (200-250 words maximum) are due **February 19, 2010** and will be peer-reviewed by an independent, objective review committee.

**Inaugural Issue of the Journal of Participatory Medicine (JPM)**

JPM's mission

is to transform the culture of medicine by using evidence to document the impact of participatory medicine on health outcomes. Participatory medicine is a cooperative model of health care that encourages, supports and expects active involvement by all parties (clinicians, patients, caregivers, administrators, payers and communities) in the prevention, management and treatment of disease and disability and the promotion of health.

JPM will explore how patient participation impacts health outcomes, resources and relationships; which interventions drive participation most effectively; and what type of evidence is most reliable.

JPM, published by The Society of Participatory Medicine, is an academic, peer-reviewed journal available at no cost using an online journal format.

**AOTF Institute Image of the Month**

From the *Archives of the AOTA*, housed in the AOTF Wilma L. West Library.

A pediatric patient works on sensory processing and grasp activities with a therapist (1972).
The AOTF Institute makes this image, as well as the Guide to the Archives of the AOTA, available publicly as part of its mission to honor the past and be the best possible steward of the unique body of knowledge that is occupational therapy. To this end, the AOTF Institute warmly welcomes individuals from within and beyond occupational therapy to explore the guide and use the archives for purposes of research, education, and leadership.

Watch for AOTF Events at the AOTA 2010 Conference in Orlando, Florida

Events in red are sponsored by the AOTF Institute for the Study of Occupation and Health

Wednesday, April 28
12 - 6:30 p.m. Institute 003 AOTA/AOTF Grant Writing for Researchers
7:30 - 10 p.m. DocNet Reception and Annual Meeting - Powerful Practice and Unique Opportunities

Thursday, April 29
12:30 - 3:30 p.m. Qualitative Research Exchange (QRE) - Engaging Marginalized Populations Through Qualitative Research

Friday, April 30
7:30 - 9 a.m. Breakfast with a Scholar - Personal Project Pursuit: On Human Doings and Well-Beings - Brian R. Little, PhD, psychologist
1:30 - 4:30 p.m. Research Colloquium & Tea - Research on the Role of Environments in Promoting Occupation, Participation, and Health
8 - 11 p.m. AOTF Gala - Dance the night away at the Cuba Libre Restaurant & Rum Bar

AOTF is concerned about privacy and will only send Research Resources to those individuals who wish to receive it. If you no longer wish to receive Research Resources, or if you feel that you received this newsletter in error, please use the SafeUnsubscribe link at bottom of this email. AOTF does not sell email addresses to other parties.
